## Skills

Hello, I made very basic and small games. I mostly use Unity 3d as a primary game engine in Windows PC. I have done web and desktop development along with game development. I love learning new things, tools and software, don't know when to work.

- **Web** : - HTML, ASP.NET.
- **Desktop** : - C# .NET
- **Database** : - MS SQL Server, Azure SQL.
- **Testing & Debugging** : - Visual Studio.
- **Other** : - Python, Android.

## Education

July 2015 - May 2016

**Ujwalatai pawar school, Aurangabad - SSC**

Passed SSC board with 68.6% (Maharashtra state board of secondary & higher secondary education, Pune ).

July 2016 - May 2019

**Shreeyash Polytechnic, Aurangabad - Diploma**

I have completed a diploma in computer engineering with 67.06 % (Maharashtra State Board of Technical Education, Mumbai).

Currently

**Maharashtra Institute of Technology, Aurangabad - B-Tech**

I am a student of computer science & Engineering from Dr. Babasaheb Ambedkar Technological University

## Projects

- My first and final year project of Diploma is SM car Racing.(Desktop application (2018))
  - This is my first complete game made by a group of 3 engineering students in 8 months.
- Helpofinfo.co.in (Website (2018))
  - This website has been created to make small shops modern.

- School library Management System(Desktop (2018))
  - This system was designed to manage the books of different labs and library of Renuka High School, Aurangabad.
- School & college Management System(Enterprise (2019))
  - A group of 5 engineering students worked on this system for Bai jai Trust. This system has both desktop and web interchangeability mixers.
- Street Runner (Android Application (2020))
  - This is my first android game. This is an endless run game.
- Tappy Rocket (Android Application (2020))

## Achievements
